

Investment Philosophy

Olstein Capital Management believes:

- A company's stock price often falls below its private market value due to temporary problems or an extended period of poor corporate performance. Significant deviations may provide opportunities for above-average, long-term returns.
- Small- to mid-sized companies that face unique strategic challenges, often as a result of unrealistic expectations for growth, present compelling opportunities for the patient investor.
- Excess cash flow is the lifeblood of a business. Companies that generate excess cash have the potential to enhance shareholder value by increasing dividend payments, repurchasing company shares, reducing outstanding debt, engaging in strategic acquisitions, being acquired, or withstanding an economic downturn without adopting harmful short-term strategies.
- Forensic analysis of financial statements reveals the quality of a company's earnings, the success of its strategy, sustainability of its performance and impact of management decisions on future cash flow and is more useful to an investor than earnings guidance.

Investment Process Highlights

- Seeks long-term capital appreciation by investing in the undervalued equity securities of small- to mid-cap companies that may face unique strategic choices, challenges or problems.
- Analysis focuses on how a company's operations generate sustainable free cash flow; how much cash is available to investors and level of ongoing investment required to maintain and grow free cash flow.
- Valuations based on free cash flow. Reliable valuations require: determining if a company's accounting policies reflect economic reality; assessing a company's Quality of Earnings; accounting adjustments to eliminate management bias, and identifying positive or negative factors that may affect future free cash flow.

Standardized returns reflect deduction of the maximum 5.50% sales charge applicable to Class A shares. Class A shares purchased subject to a front-end sales charge have no contingent deferred sales charge (CDSC). However, certain purchases of Class A shares made without a front-end sales charge may be subject to a CDSC of 1% if the shares are redeemed within 12 months of the purchase. The CDSC is not reflected in the performance with maximum sales charge.

Class C

	OFSCX		Russell 2500™ Value Index	Russell 2500® Index
	w/o sales charge	w/sales charge		
Cumulative Returns				
Last 3 Months	33.76%	32.76%	28.51%	27.41%
Year to Date	14.98%	13.98%	4.88%	19.99%
Average Annual Returns				
One Year	14.98%	13.98%	4.88%	19.99%
Three Years	7.76%	7.76%	4.34%	11.33%
Five Years	9.49%	9.49%	9.43%	13.64%

Performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Value stocks can continue to be undervalued by the market for long periods of time. Current performance may be lower or higher than performance quoted; to obtain performance data current to the most recent month end please go to our website at www.olsteinfunds.com.

The Russell 2500 Value Index measures the performance of the small to mid-cap value segment of the U.S. equity universe. It includes those Russell 2500 companies that are considered more value oriented relative to the overall market as defined by Russell's leading style methodology. The Russell 2500 Value Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The Russell 2500 Index is an unmanaged index that measures the performance of the small to mid-cap segment of the U.S. equity universe. The Russell 2500 is a subset of the Russell 3000 Index. It includes approximately 2500 of the smallest securities based on total market capitalization. Investors cannot actually make investments in either index.

An investment in a portfolio containing small- and mid-cap companies is subject to additional risks, as the share prices of small- and mid-cap companies are often more volatile than those of larger companies due to several factors, including limited trading volumes, products, financial resources, management inexperience and less publicly available information.
